**From Practice to Theory: Documenting
Karnataka's Indigenous Knowledge in the
Context of Climate Change**
Date: 02nd March 2024

About the Conference

From Practice to Theory: Documenting Karnataka's Indigenous Knowledge in the context of Climate Change

The Karnataka Higher Education Academy, Dharwad, is delighted to announce the National Conference on "From Practice to Theory: Documenting Karnataka's Indigenous Knowledge in the Context of Climate Change." While climate change is a global phenomenon, its impacts are deeply felt and confronted at the local level. Karnataka's agricultural landscape and traditional practices are intricately linked to the environment, and climate change poses a direct threat to these systems. Some of the potential climate change symptoms like altered rainfall patterns in terms of timing and distribution, temperature extremes, and shifts in the flowering and fruiting patterns of crops like mango and coffee are already visible in the state. We need to understand these changes and develop strategies to adapt to the evolving climate conditions.

This conference aims to emphasize the local dimensions of climate change and highlight the need for a region-specific approach to address its challenges. By focusing on Karnataka's unique ecological and cultural context, we hope to explore and document indigenous practices that can offer insights into sustainable adaptation and mitigation strategies.

By doing so, we aim to create a comprehensive repository of indigenous practices that local communities employ to cope with and mitigate the effects of climate change. This collective effort will not only deepen our understanding of the region-specific challenges but also provide a platform to showcase the resilience and resourcefulness of local communities.

Therefore, we earnestly invite the academic fraternity to actively participate in this conference by submitting papers that document climate change patterns and the methods of adapting to the changes in their respective localities. Share your insights on how communities are affected, the innovative indigenous practices they employ, and how these practices can contribute to broader discussions on climate change mitigation.

About HEA

Established by the Government of Karnataka in Dharwad on June 13, 2015, the Higher Education Academy (HEA) aims to enhance higher education standards in the state. Initially focusing on training newly recruited teachers from government first-grade colleges, HEA has successfully inducted 2100 Assistant Professors through a 21-day residential program over the past six years.

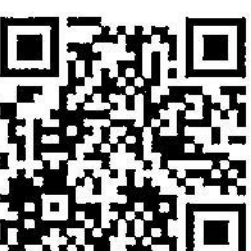

The Academy extends its impact beyond teachers to include Principals, Librarians, Non-teaching staff, and students, offering academic, administrative, and accreditation awareness sessions. In response to evolving educational needs, HEA now provides continuous and holistic training programs for various stakeholders. These programs emphasize student-centric, outcome-based, participative, and actively-based teaching methods.

In its current phase, HEA places increased emphasis on research methodology training, administrative skills development, and instilling Indian constitutional values. The academy is also working towards introducing a training module on Indian Knowledge System. HEA's focus extends beyond academics to the holistic development of teachers, administrators, and students, aiming to boost self-confidence, self-belief, and awareness of tools and strategies for a conducive educational environment and also promotes the practice of constitutional values. The academy serves as a catalyst in enhancing the overall quality of academics and education in Karnataka's higher education institutions.
